Summary

Python & SQL Developer with hands-on experience in backend development, database management, REST API development, and data automation. Proficient in Python, SQL, Flask, and data processing using Pandas. Experienced in designing database-driven applications, writing optimized SQL queries, building ETL workflows, and developing scalable web applications. Strong understanding of relational databases, query optimization, and data analytics.

Education

B.Tech — Computer Science & Engineering

S. B. Jain Institute of Technology, Management & Research, Nagpur

2022-2026 | CGPA: 8.01/10

Experience

Software Developer Intern—MAHAGENCO, Nagpur:

- Assisted in developing Python-based solutions to improve system efficiency in an industrial environment
- Collaborated with team members to understand real-world system workflows and translate them into software logic

Cybersecurity Intern (CSEH) — NSDC Skill India

- Analyzed common cybersecurity attack patterns and system vulnerabilities
- Performed basic vulnerability assessments and studied ethical hacking methodologies
- Gained practical exposure to threat identification and secure system practices

Skills

Programming Languages

- Python, SQL, JavaScript, HTML, CSS

Backend Development

- Flask, FastAPI, REST API Development, API Integration, CRUD Operations

Database Management

- SQLite, Oracle Database, Database Design, Relational Databases, Query Optimization, SQL Joins, Aggregations, Normalization

Data Analysis & Automation

- Pandas, NumPy, Data Cleaning, Data Transformation, , Data Visualization, Excel Automation

Developer Tools

- Git, GitHub, PythonAnywhere

Core Computer Science Concepts

- Object-Oriented Programming (OOP), Data Structures & Algorithms, Client-Server Architecture, Networking Fundamentals, Problem Solving, Debugging

Core Concepts:

- API Integration, CRUD Operations, Networking Fundamentals, Client-Server Architecture

Projects

Web Scraper Project | Live App: <https://webscraper.pythonanywhere.com>

- Scraped and analyzed 1,000+ job listings per execution using Python and BeautifulSoup.
- Processed and transformed 1,000+ records using Pandas, reducing manual effort by 70%.
- Developed search and filtering features supporting 500+ searchable records.
- Generated automated Excel reports with 2-sheet exports and visual analytics using OpenPyXL.
- Reduced job tracking time from 3–4 hours to under 5 minutes through automation.

Expense Tracker || Live App: <https://expensetracker1.pythnanywhere.com>

- Developed a full-stack expense management application handling **100+ transactions per user**.
- Built and integrated **5+ REST API endpoints** for secure CRUD operations.
- Optimized SQLite queries, improving data retrieval performance by **30%**.
- Implemented real-time dashboards and visualizations, improving spending analysis speed by **2x**.
- Conducted usability testing with **5+ active users**, enhancing application functionality.
